

Fences

The first step in planning a fence is to prepare a plan of the proposed fence indicating the proximity of the fence to the property line, location of any structures (house, garage, etc.) and the height of the fence. **The Town does not require a development permit or a building permit for a fence less than 2 meters in height, but there are specific height restrictions for certain parts of your property.**

Maximum height includes fences, walls, shrubs, hedges, etc.
