

Fence Information Sheet

The first step in planning a fence is to prepare a plan of the proposed fence indicating the proximity of the fence to the property line, location of any structures (house, garage, etc.) and the height of the fence. The Town does not require a development permit or a building permit for a fence less than 2 meters in height, but there are specific height restrictions for certain parts of your property.

Maximum height includes fences, walls, shrubs, hedges, etc.
